

BIOETCH[©] BY HIDAYATH

ECO-FRIENDLY SURFACE ETCHING

SUSTAINABLE INNOVATION IN STAINLESS STEEL DESIGN.

CLEANER PROCESS. CUSTOM DESIGNS. ENDLESS POSSIBILITIES.

BIOETCH is Hidayath's innovative etched stainless steel solution, developed to offer a more responsible approach to architectural surface design. Created through an eco-conscious manufacturing process that eliminates the need for harsh chemicals traditionally associated with metal etching, BIOETCH represents the next generation of decorative stainless steel finishes.

Combining sustainability with design freedom, BIOETCH allows architects, interior designers, and developers to transform stainless steel into distinctive architectural features without compromising on quality, durability, or visual impact. From subtle textures to intricate bespoke patterns, BIOETCH provides limitless opportunities to create surfaces that enhance the character of a space.

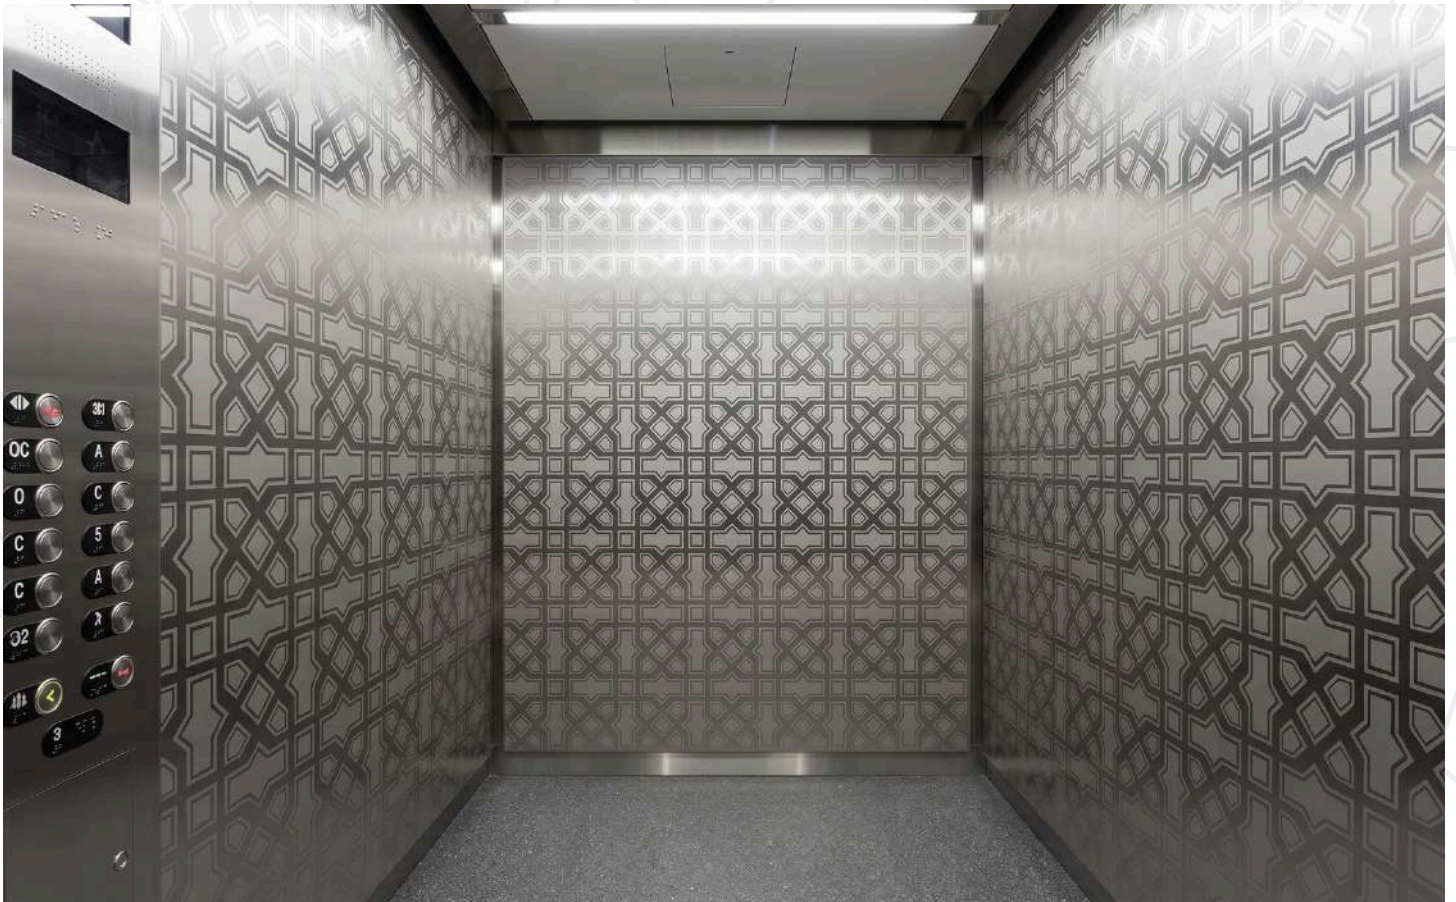

As modern architecture increasingly prioritizes sustainable materials and responsible manufacturing, BIOETCH presents a solution that aligns with both environmental values and contemporary design standards.

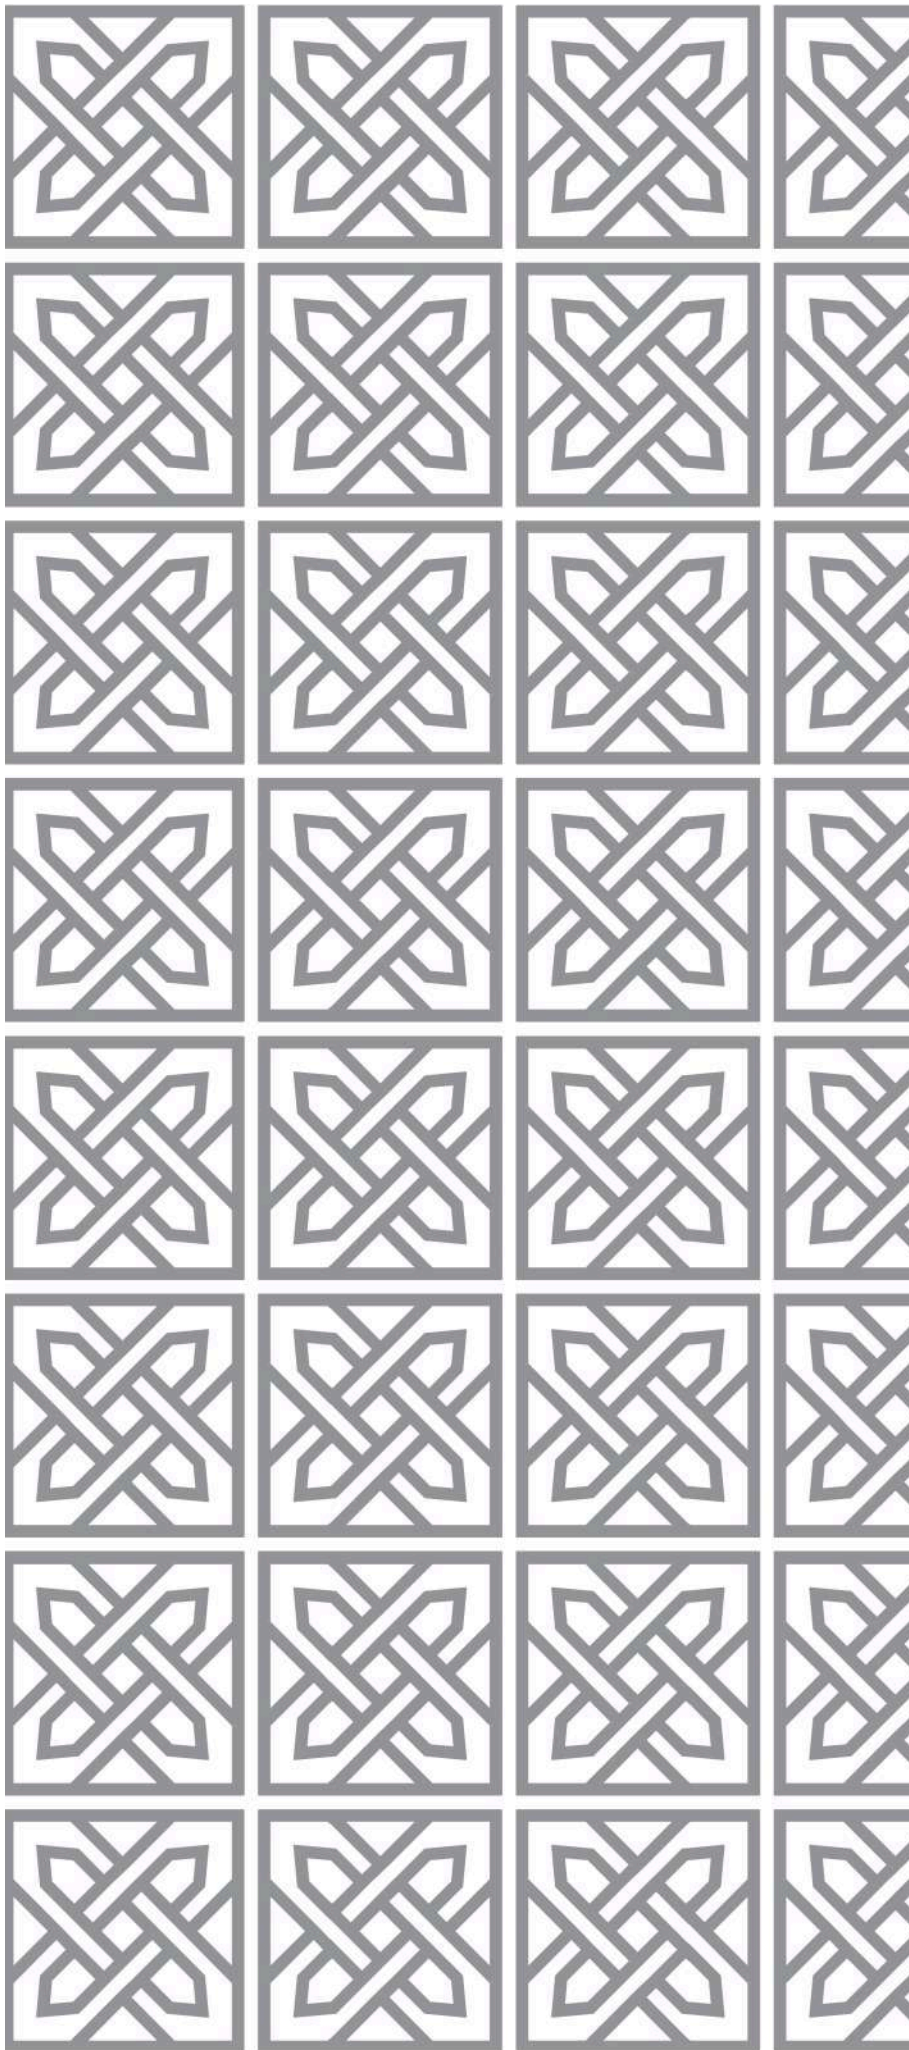

BIOETCH offers complete design flexibility, allowing custom patterns to be created for projects of any scale and style.

Available in our signature **Hairline and Mirror finishes**, BIOETCH can also be enhanced with PVD colour coatings in a range of architectural shades, including **Gold, Bronze, Black, Champagne, and Rose Gold**.

From subtle elegance to bold statement designs, BIOETCH provides architects and designers with the freedom to create surfaces that are uniquely their own.
